ABSTRACT

Statistical data is presented concerning the degrees conferred in Virginia public and private institutions of higher education, 1972-73. Section I indicates degrees conferred by all Virginia institutions of higher education. Section II indicates degrees conferred by state-supported institutions of higher education and Section III reviews degrees conferred by privately controlled institutions of higher education. Trends in degrees conferred indicate Virginia's institutions of higher education conferred 26,498 degrees in 1972-73, an increase of 9.4 percent over the 24,219 conferred during the previous year. Of the 26,498 degrees, 20,614, or 78 percent, were awarded by state-supported colleges and universities and 5,884, or 22 percent, were conferred by private institutions. The percentage of total degrees awarded by these institutions has decreased from 26 percent in 1970-71 to the present 22 percent. This is the result of similar trends in enrollment that indicate private colleges and universities in Virginia are enrolling a decreasing proportion of overall enrollment. Particularly rapid rates of increase can be noted in the number of associate, first professional and master's degree levels in Virginia. These levels represent an increasing proportion of the total degrees conferred. (Author/MJM)

TRENDS IN DEGREES CONFERRED

Virginia's institutions of higher education conferred 26,498 degrees in 1972-73, an increase of 9.4 percent over the 24,219 conferred during the previous year. Of the 26,498 degrees 20,614, or 78 percent, were awarded by state-supported colleges and universities and 5,884, or 22 percent, were conferred by private institutions. Since 1970-71, the first year in which the Council of Higher Education collected information for private institutions, the percentage of total degrees awarded by these institutions has decreased from 26 percent to the present 22 percent. This is the result of similar trends in enrollment which indicate that private colleges and universities in Virginia are enrolling a decreasing proportion of overall enrollment.

Particularly rapid rates of increase can be noted in the number of Associate, First Professional and Master's degrees levels in Virginia. These levels represent an increasing proportion of the total degrees conferred. The increase at the Associate degree level is the result of the rapid expansion of the state-supported Community College System. The rapid expansion in graduate programs offered by Virginia state-supported senior institutions is responsible for significant increases in the number of First Professional and Master's degrees conferred. It should be noted, however, that the annual rate of increase in the total number of degrees conferred by state-supported institutions has decreased from 13.6 percent in 1970-71 to 11.9 percent in 1972-73. The five discipline divisions in which the largest number of degrees were awarded were Education, Social Sciences, Business and Management, Occupational-Technical Discipline Divisions, and Letters (includes English and Literature). Within the field of Education 35 percent of the degrees conferred were Master's degrees, an indication of the advanced academic preparation being obtained by persons in this professional area. Occupational-Technical degrees are obtained only at the Associate degree level and 89 percent of these degrees were awarded by the Virginia Community College System.

STATE-SUPPORTED COLLEGES AND UNIVERSITIES

Of the 20,614 degrees awarded by state-supported institutions in 1972-73, 17 percent were Associate degrees, a significantly higher percentage than the 9 percent that this degree level represented as recently as 1968-69. This increase parallels the development of the Community College System with its extensive number of Associate degree programs. Master's degrees, like Associate degrees, have accounted for an increasing proportion of total degrees over the five year period, from 15 percent in 1968-69 to 17 percent in 1972-73. As a result of these trends, Bachelor's, First Professional, and Doctor's degrees have steadily declined as proportions of the total degrees awarded.

The state-supported four-year colleges and universities experienced an 8 percent increase in degrees conferred from 1971-72 to 1972-73. The largest percentage increases occurred at Christopher Newport College and George Mason University, although Old Dominion University, Virginia Polytechnic Institute and State University, Virginia Commonwealth University, and the University of Virginia, as older and larger institutions, continued to award over one-half of all degrees conferred. The Community College System noted a 40 percent increase in the number of degrees conferred in 1972-73 over the previous year, with three institutions, New River, Northern Virginia, and Tidewater, accounting for over one-half of the increase.

The state-supported institutions conferred 73 percent of all their Bachelor's and higher degrees within five conventional academic discipline divisions. Despite problems being experienced by teachers seeking employment, Education ranked first with 4,703 degrees, an

increase of 12 percent over 1971-72. Social Studies conferred 2,204 degrees, which was a decrease of 2 percent from 1971-72. Business and Management continued to grow rapidly awarding 13 percent more degrees in 1972-73 for a total of 2,000. Engineering, although experiencing a continuing decline, maintained fourth position with 1,083 degrees. For the first time in five years, the discipline division of Letters produced fewer degrees than the previous year, decreasing by 2 percent from the 1,060 conferred in this field in 1971-72. Of the remaining academic discipline divisions, only Foreign Languages (down 16 percent) and Medicine (down 1 percent) experienced actual decreases in the numbers of degrees conferred.

At the Associate degree level, both Associate in Applied Science and Associate in Arts or Sciences degrees increased over 1971-72. However, the increase in Applied Science degrees was far greater (54 percent) than the increase in Associate in Arts or Sciences degrees (12 percent). In contrast to 1971-72 when they represented 51 percent of all Associate degrees conferred, Associate in Applied Science degrees accounted for 58 percent of all Associate degrees in 1972-73. This indicates a shift in the degree of student preference for the Occupational-Technical programs which award Associate in Applied Science degrees. Of the 2,094 Applied Science degrees awarded by community colleges, nearly one-half were in the area of Business and Commerce Technologies, and 21 percent were conferred in Mechanical and Engineering Technologies.

Men earned 57 percent of all degrees conferred by state-supported institutions in 1972-73, a slightly higher percentage than the 56 percent they earned in 1971-72. This increase can be attributed primarily to the Associate degree level where men earned 65 percent of the degrees in 1972-73 compared to 62 percent in 1971-72.

PRIVATELY CONTROLLED COLLEGES AND UNIVERSITIES

Of the total 5,884 degrees awarded by private institutions in 1972-73, 14 percent were Associate degrees, a decrease from the comparable percentage of 17 percent which were awarded in 1971-72. Bachelor's and Master's degrees represented slightly smaller proportions of the total degrees awarded over the same time period.

The number of degrees conferred by four-year privately controlled institutions increased by 4 percent from 1971-72 to 1972-73. Eight of these institutions, however, experienced actual decreases, among them two of the largest private institutions, the University of Richmond and Hampton Institute. Two institutions, Union Theological Seminary and Washington and Lee University, accounted for 75 percent of the total increase at four-year private institutions. Degrees conferred by two-year private colleges decreased by 14 percent from 1971-72 to 1972-73, Bluefield being the only school to experience an increase. This 14 percent decrease was due in part to the conversion of Virginia Intermont College from a two-year to a four-year institution.

The five discipline divisions in which the largest number of Bachelor's and higher degrees were conferred in 1972-73 by privately controlled institutions correspond closely to those of the state-supported institutions. Of the Associate degrees conferred by private institutions, 67 percent were college transfer or Associate in Arts or Sciences degrees, and the remainder were Associate in Applied Science degrees in the Occupational-Technical discipline divisions. Business and Commerce Technologies accounted for nearly one-half of the 262 Associate in Applied Science degrees, with Health Services and Paramedical Technologies awarding another 40 percent.

The privately controlled institutions awarded slightly less than one-half of their degrees to men in 1972-73, and at the Associate degree level only 25 percent of the degrees were awarded to men.

DEFINITIONS*

Associate Degree
A degree awarded upon completion of at least two but less than four years of work beyond high school. In Virginia the degrees of Associate in Arts and Associate in Science are based on work that is wholly or chiefly creditable towards a bachelor's degree. The degree of Associate in Applied Science is based on work in one of the occupational-technical fields and is designed to prepare for immediate employment.

Bachelor's Degree
A degree granted upon completion of an educational program requiring at least four but not more than five years of academic work in the liberal arts, sciences, and professional fields.

First Professional Degree
A degree which signifies the completion of the academic requirements for a selected profession, which is based on an educational program which requires at least two academic years of previous college work for entrance and which requires a total of at least six academic years of college work for completion. (First professional degrees included in this report are the Bachlor of Laws [LL.B.], Doctor of Dental Surgery [D.D.S.], Doctor of Medicine [M.D.], and Juris Doctor [J.D.].)

Master's Degree
A degree customarily granted upon successful completion of one (sometimes two) academic years of work in the liberal arts and sciences beyond the bachelor's degree. The master's degree in professional fields is an advanced degree beyond the first professional but below the Ph.D. degree, such as Master of Laws (LL.M.). (Master's degrees in hospital administration and social work are included in the master's degree category in this report.)

Advanced Certificate
A certificate which requires one academic year's work past the master's and may take as much time as two calendar years. It indicates general knowledge and competence in a field of specialization and is most common to the discipline division of Education.

Doctor's Degree
The highest academic degree in a given discipline or profession, based generally on (a) three or more years of graduate work, (b) satisfaction of a foreign language requirement, and (c) completion of a special study issuing in a dissertation approved by a committee of the faculty. (Doctor's degrees included in this report are the Doctor of Education [Ed.D.], Doctor of Philosophy [Ph.D.], and Doctor of Science [D.Sc.] degrees.)

Collegiate Professional Certificate**
A five-year renewable certificate which is granted an applicant who has earned a bachelor's degree from an accredited college or university and has completed the general requirements (including general education), professional education, and specific endorsement requirements (elementary, high school, or special education) as established by the State Board of Education.
